Quick Facts

SABRE III is the latest generation of improved Poa trivialis from DLF International Seeds' plant breeding program. It was developed to provide golf course superintendents who oversee with a denser and darker green turf. Sabre III has shown improved overall turf quality in comparison to older varieties. Other benefits of overseeding with Sabre III include rapid establishment and a good level of resistance to leaf spot. Sabre III was developed for elite, rapid to establish, easy transitioning winter overseeding turfgrass mixtures. It's also recommended for cool season, shade tolerant, mild climatic zones. It has excellent shade tolerance.

- Dark green color
- Quick establishment
- Very fine texture
- Good cold tolerance
