

SHAMROCK

Poa pratensis

Kentucky Bluegrass

Dense & Strong

- Very wear tolerant
- Fine dark leaves
- Exceptional persistence
- High plant density

Cold tolerance	Wear tolerance	Spring green-up	Color
			medium green

Quick Facts

SHAMROCK is one of the most aggressive bluegrasses available. It forms a sod so dense that most weeds simply can't find room to grow. Shamrock exhibits early spring green-up with a rich dark green color. It will provide a dense, consistent lawn all season long.
