

17-0-20

A homogeneous granular fertilizer for greens and tees

micro particle size
100% Homogeneous

GUARANTEED MINIMUM ANALYSIS

| | | % |
|---------------------------------------|--------------------|------|
| Total nitrogen | (N) | 17.0 |
| Nitrogen from Methydure | | 10.2 |
| <i>WIN (water insoluble Nitrogen)</i> | | 7.0 |
| Nitrogen from urea | | 6.8 |
| Water soluble potash | (K ₂ O) | 20.0 |
| Sulphur | (S) | 9.0 |
| Calcium | (Ca) | 3.5 |
| Magnesium | (Mg) | 1.7 |
| Iron | (Fe) | 0.16 |

PRODUCT FEATURES

- Micro-prill homogeneous fertilizer. Easy to apply product and uniform Nitrogen release.
- 60% slow-release nitrogen from Methydure®.
- All of its potassium is in the sulphate form.

TURF BENEFITS

- Methydure® feeds for 16 weeks. Thus, nitrogen is less likely to leach and the risk of fertilizer burn is reduced. The release longevity of all fertilizers is reduced by temperatures above 20°C.
- Its iron content enhances a rich colour.
- Its potassium concentration is formulated for soils that are medium in potassium content.
- Its micro particle size makes a better distribution of the fertilizer pellets per unit area than conventional fertilizers to provide a uniform nutrition everywhere.
- Its very small particle size greatly minimizes the possibility of mower pick-up.

| Bag kg (lb) | Area covered m ² (ft ²) | Nutrients supplied kg/100 m ² (lb/1000ft ²) | | | Product application rate kg/100 m ² (lb/1000 ft ²) |
