PRODUCT FEATURES

- Contains four nitrogen materials of which two provide 75% slow-release nitrogen at three different release rates: fast, medium and slow provided from Methydure[®] and SCU.
- Phosphorus is derived from Hyper-Phos[®].
- All of its potassium is in the sulphate form to minimize the burn potential.

TURF BENEFITS

- Its mini particle size greatly reduces the amount of fertilizer pellets picked-up in the mower's baskets.
- For use on turf soils low to medium in phosphorus levels and medium in potassium.
- Hyper-Phos[®] organic coating protects phosphorus from binding to positively charged elements such as Iron and Aluminium. The phosphorus applied with Hyper-Phos[®] is more available to the plant and for a longer period of time.
