	TOTAL	100.00%

Due to availability, there may be some changes in species and or percent of species.

Taylor's Low Grow Wildflower Mix is made up of 26 species, of which approximately 70% are annual and 30% are perennial flower seeds. These Wildflowers are chosen for their natural beauty, long flowering periods and low growing characteristics. The mix will grow to a height of 18-24 inches under normal growing conditions. It is ideal for an area where the flower beauty is wanted along with a shorter flowering bed.

Approx. seeds per pound: 627,800

Seeding rate: 5-9 pounds per acre depending on density desired
1 pound per 6,000 square feet
