	<b>TOTAL</b>	<b>100.00%</b>

Due to availability, there may be some changes in species and or percent of species.

Taylor's Mountain Wildflower Mix is designed to do exceptionally well in the Mountain Areas of the U.S. and Canada. The mix consist of 23 species, 45% annuals and 55% biennials or perennials which means the mix will give color the first year and prosper for many following years. Many of these varieties do very well in higher elevations with limited moisture. The Mountain Wildflower Mix will reach a height of approximately 36-48 inches under normal conditions.

Approx. seeds per pound: 610,700

Seeding rate: 5-8 pounds per acre depending on density desired  
1 pound per 6,000 square feet

If Hydro seeding, seeding rate should be doubled.
